

Emergency Preparedness Policy

On each job site for Karson Builders Ltd. the manager and/or supervisor will gather information such as location of the nearest hospital and eye-wash station, and who is trained in first-aid to help minimize travel time for treatment for all employees. Emergency numbers will be posted on each site including the Karson Builders Ltd. contact numbers. In the event of a fire, the fire extinguishers should be clearly marked and highly-visible to everyone on site.

This information is to prevent confusion during an emergency situation, should an accident occur.

All employees are to be aware of the action required, but should follow the instructions set by the site supervisor. A designated meeting place (muster point) will be assigned to assure that all or any evacuated have been accounted for should the situation arise.

All persons entering the site are made aware of this information during site orientation.

The information in this policy does not take precedence over applicable government legislation, with which all employees should be familiar.
