

Hazard Assessment Policy

The policy of Karson Builders Ltd. is to have each job site assessed for hazards prior to the start of each job. A walk through of the site must be completed to ensure it is safe. If a hazard should be discovered it should be documented and addressed immediately. The site superintendent will be responsible for addressing all or any issues as discovered regardless of whether the beginning of the project or while in progress. The safety of all personnel on our sites is of the utmost importance and hazard assessments must be completed on a regular basis to alleviate the possibility of safety issues being left unaddressed. This process is for the safety of all on our sites and will be enforced.

The information in this policy does not take precedence over applicable government legislation, with which all employees should be familiar.
